

FCRTA Charging Master Plan and EMS Plan RFP Q & A

1. Does this scope of work include development of pricing for public charging?

Development of public charging is not a requirement of the scope but may be included if your budget allows. Whether they are public or not will also be based on where the chargers will be located.

2. If we submitted a proposal, would we be disqualified when the RFP comes out to actually bid on the project?

No, you would not be disqualified however future projects/RFP are subject to available funding and/or grant requirements.
